Objective

To leverage my academic background and technical skills in a challenging role that fosters learning, collaboration, and innovation while contributing effectively to project success.

Skills

- **Programming :** Java.
- **Front End :** HTML, CSS, JavaScript, BootStrap, Angular, React JS.
- **Back End :** Spring, Maven, Spring MVC, Spring Boot, Spring Security, Hibernate, JDBC, SQL, Microservices.
- **Others :** Docker, Sonar Qube, Git, GitHub, Jira, GCP, Junit, Unity 2D.

Experience

Cognizant, Java Full Stack Developer — Apr 2025 – Present

- Worked on the MetLife Insurance project, enhancing application features and fixing bugs using Java Full Stack technologies.

Education

Bachelor of Technology, Raghu Institute of Technology in Data Science - 8.8 CGPA — Aug 2021 – May 2024

- Honors Degree in Machine Learning - 7.9 CGPA

Diploma, Mrs AVN Polytechnic College in Mechanical Enginnering - 9.2 CGPA — Aug 2018 – May 2021

10th Standard, Mindi High School in General Education - 9.7 CGPA — June 2017 – May 2018

Projects

Comparative Analysis of Spam Detection on Social Media Networks

- Conducted a comparative study using five supervised machine learning algorithms on datasets sourced from Twitter, Facebook, Messenger, Instagram, and LinkedIn. Preprocessed text data with feature extraction techniques in Jupyter Notebook; implemented models including Naive Bayes, SVM, Decision Trees, Random Forest, and KNN for classification.

Library Management System

- Developed a modular Library Management System using Spring Boot, JPA, and MySQL, focusing on real-world entity modeling and relational mapping. Implemented token-based member authentication with custom filters and secure password hashing using BCrypt.

Zytra – An E-Commerce Project

- Architected a scalable e-commerce platform similar to Amazon using Spring Boot, Maven, JPA, and MySQL. Implemented JWT-based authentication and Spring Security for secure user sessions and role-based access. Designed REST APIs for product catalog, shopping cart, order management, and payment workflows.

Certifications and Achievements

- Successfully completed the NPTEL certification courses in Python for Data Science, Fundamentals of AI.
- Successfully completed an online internship in Amazon Web Service.

Hobbies

- Playing Cricket.
- Reading Comics (Anime).
